

Battery Analyzer

Model:KT-99

Features:

- Measure battery storage capacity with clamp-on sensor
- Test battery capacity under it's real working condition
- Select different type of battery with discharge end voltage
- Display current and voltage during testing
- Display battery parameters and time
- Auto-alarm when test finish,alternatively data saving
- Auto backlight on in dark area
- Maximal capacity count up to 999.9Ah
- 4-wires mode impedance measurement Up to 0.01m Ω resolution
- Operating Environment: 0~40°C ,<80% R.H
- Storage Environment : -20~60°C ,<80% R.H
- Power supply: Heavy duty 9V Alkaline battery (IEC-6F22)
- Accessories: "4 wire" test leads 1 pair
"2 wire" test leads 1 pair
