

MA-121, MA-121F: Dial Thermometer, 25°—125°F (0°—50°C)

MA-121 Dial Lab Testing Thermometer, 25°—125°F and 0°—50°C is a dual range thermometer with 2in (50.8mm) diameter polycarbonate dial. The dial face has °F or °C scales with divisions in 1°C and 2°F, a 304 stainless steel dial case, 0.15in (3.8mm) diameter stem, and an adjustable mounting clip. The polycarbonate face is not designed for oven use. It is accurate to 1% of range. An adjustment nut allows calibration to known temperature.

Model MA-121F has similar features, but is single range for testing at 25°—125°F, and is equipped with a 1.75in (44.45mm) diameter polycarbonate dial face.

Features:

- 8in (203mm) long
- 304 stainless steel dial case

Included Items:

- MA-121 Dial Lab Testing Thermometer, 25°—125°F and 0°—50°C (dual range), or MA-121 Dial Lab Testing Thermometer, 25°—125°F (single range)
