

SX3-Series Precise Digital Graphite Hot Plate

Uses:

It is used for heating liquid in industry, agriculture, health and medicine, scientific research and college labs etc.

Characteristics:

- 1.Heater is made from special molding process, the temperature rising fast.
- 2.Isostatic Graphite heating surface is anti-distortion, and heating uniformity.
- 3.Hot plate surface temperature can up to 450°C.
- 4.Heating power is steeples adjusted.
- 5.LCD screen shows the liquid temperature clearly, with features of high accuracy, easy to operate and safe.

(Main Technical Parameters):

Model	Voltage	Power (KW)	Temperature Range (°C)	Tem.Resolution Ratio (°C)	Temperature Precision (°C)	Hot Plate Size (mm) L*W
SX3-3.5-450	220V/50Hz	3.5	RT+50~450	0.1	± 2	420 × 300
SX3-4.5-450		4.5				600 × 400

Performance parameter testing condition: temperature 20°C, ambient humidity 50%RH
