

4 in 1 Digital Soil Meter

Description:

This electronic digital display soil analyzer is the latest soil measuring device. It mainly tests soil pH, moisture and humidity, temperature and light intensity for plants. It uses a 9V carbon battery. The instrument also has a low battery indicator and auto power off function. It saves time and effort, and is highly efficient. The instrument is suitable for planting flowers and grass, landscaping.

Technical Specifications:

Test object	Sunlight , Moisture , PH value , Temperature	
Test range	Sunlight(9 levels)	LOW- , LOW , LOW+ , NOR- , NOR , NOR+ , HGH- , HGH , HGH+
	Moisture(5 levels)	DRY+ , DRY , NOR , WET , WET+
	PH value(12 levels)	3.5~9.0 (Display resolution 0.5)
	Temperature	-9~+50 degrees C (16~122 degrees F) (Display resolution 1 degrees C/1 degrees F)
Power supply	One 9V block battery	
Automatic off	The unit will be automatically off after 5 minutes disabling.	
Operating temperature	+5 ~+40 degrees C	
Size	Main unit	122cm x 63cm x 36cm(Approx.)
	Test probe	φ5mm x 200mm(Approx.)

Application:

- Soil PH value of Flowers and grasses planting
- Soil PH value of Garden virescence
- Great for quick pH & Moisture Reference of Vineyards , Orchards
- Soil PH value of Nursery Planters
- Soil PH value of Lawn Maintenance

Made in China
