

Metal Detector

Model: Z31174

Specifications:

- Reversible unit (m / ft.)
- Detects: Wood, AC wires, metal
- Laser Class: 2
- Max. Power output (P_{\max}): < 1 mW
- Wave Length: 635 - 660 nm
- Power Supply: 9 V Block Battery

Features:

- Versatile assistant for home construction, remodeling, renovation, etc.
- Ultrasonic Distance Measurer with area and volume calculation
- Multi-sensor to detect metals, live wires and wooden substructures
- Large, clear LCD display with backlight
- Memory to recall last measurement results
- 5-in-1 functions:
 1. Ultrasonic Distance Measurement (about 0.6 -16.0 m) with area and volume calculation
 2. Detection of wooden substructures up to 38 mm depth
 3. Detection of live wires up to 35 mm depth
 4. Detection of metal to about 24 mm depth
 5. Integrated Laser marking up to 10 meters range including bubble for the alignment of tiles, wall units, etc.
