

Metal Detector

Model: Z31697B

Specifications:

- Operating Voltage: 9 V, max. 1 mW
- Battery Type: 6LR61 (9 V block)
- **Detector depths:**
 - Beam (STUD): Max. 19 mm ± 3 mm
 - Metal (METAL): Max. 30 mm ± 13 mm
 - Voids (DEEP): Max. 38 mm ± 5 mm
 - AC voltage (AC): Max. 50 mm (only with lines which carry 230 V~ 50 Hz)

Features:

- **Multifunctional Detector:**
 - Exact positioning by optical and acoustic signal
 - Finding wood, metal and power lines, and cavities
 - Large, clear LCD display with battery level indicator
 - With 4 scan functions:
 1. Power up to 50 mm depth
 2. Metal up to 30 mm depth
 3. Wood up to 19 mm depth
 4. Cavity to about 38 mm depth

Ultrasonic Range Finder:

- Easily calculates length, volume and area
- Memory function for adding multiple measurements
- Measuring range: approx. 0.6m - 16m
- With inch/meter selector, auto shut-off and temperature display
- With laser diode for the determination of the measurement point and integrated bubble level to align the device
- Memory for retrieving the last measurement
- Laser diode for determining the measuring point and built-in spirit level for adjusting the equipment
- Large, easy-to-read LCD display with battery indicator
- Includes battery and instructions

Made in Germany
